

**CONDUCT OF EXAMINATION**  
**on STRENGTH OF MATERIALS**  
**for the students of the CCC – English language studies**  
**Summer semester of the academic year 2022/2023**

To take the exam, students must have certified their coursework. At the beginning, two tasks are given to solve in three hours. Students who have 40 or more points for them are admitted to the theory exam. It asks five questions (the same for all students). There is no fixed time for writing the theoretical questions.
